Subject: No to insane Toll legislation

As a commuter I find this toll as a slap to the face. I chose to live in CT because of the lack of tolls and convenience to live in a country setting while be able to commute to NY to work. Passing this legislation will only squeeze those of us that have are already heavily taxed further. As a resident of a border town (New Fairfield) I may as well move to NY and pay their taxes, at least they don't try and punish commuters. Get it together lawmakers and try managing the funds better that you have already!
