Subject: say no to tolls

To whom it may concern, I am Mike Boyle President of Base Technologies located in Bethel, we are an office technology company with 50+ employees. I realize the state has gotten itself into a jam with a kick the can down the road approach that has reached an end point. In spite of my company being located in a state that has a high cost of doing business, relative to others, we have persevered through good and bad times. My business requires my vehicles to travel in and out of CT, NY, MA, and RI on a daily basis. To me this is another tax that is pushing me to seriously consider relocating to a friendlier economic environment. I am active in the Western CT business community and my sentiments are echoed throughout our area from other business leaders. I actually hope someone is listening to us as opposed to listening to each other. Please don't make me pull up stakes and move. Enough is enough!! Mike Boyle 203-830-2473
