

I have lived in Connecticut for 43 years and I am thinking about leaving because this government will not stop sucking the population dry. Now you want tolls?? When does it stop? We are one of the only states that are losing population, we are losing jobs but for some reason the people in our government run by the worst governor in the history of the state-Malloy- will not admit its their fault. DO NOT PUT TOLLS in CT. Stand up to the unions and cut their benefits. For once in your life do the right thing. This administration is an absolute disgrace.
