Subject: Say No to Tolls

Importance: High

Tolls should not be instituted in the state of Connecticut as long as residents are being charged property tax on their vehicles. This is like double taxation in my eyes and is not fair. Spending in Hartford needs to be reeled in. My property taxes are already going to go up this year because state subsidies are ending in my town. There is only so much the citizens of the state can manage. Hartford politicians need to stop leaning on the tax payers to get them out of trouble that they created. CUT SPENDING
