A Written Testimonial to Support SB 359

Honorable Members of Education Committee:

I am a teacher in a school in CT, and I am writing to support Bill No SB359 that is to ban any type of registry of nation and ethnicity origin to ALL students. Registry of nations and the possible discriminative treatment with different ethnicity groups are going against the Constitution of the States, that all the kids born in this country are Americans. America is ONE UNITED nation that is for a UNITED cause for the future, a nation that is not entangled by the past and to be broken up by where they are originally coming from.

George Washington told us that we have to hang together, or we will be hanged separately. The human history tells us time and again, that united, we succeed, divided, we will fail.
