Honorable Members of Education Committee:

My name is Yan Huang, and I am an associate research scientist of cardiology at Yale School of Medicine. I am writing to testify in regard of bill No. SB359 "Prohibiting the Disaggregation of Student Data by Ethnic or Racial Subgroups in the Public School Information System”.

I support the original concept of "prohibiting educational institutions or other state agencies from mandatory collection and separation of data from students by subpopulations of national origin or ethnicity". However, we are very concerned in regard of this portion of the current bill language "unless .....collected uniformly across the entire population of students". I believe the entire population should not be subject to registry of ancestry immigration nation of origin or ethnicity origin.

I am supporting the original concept because I think every child in the United States should have an equal opportunity of education in spite of his or her origin or ethnicity. Every student in the United States should NOT feel different or singled out amongst classmates by the requirement of providing specific data regarding their ethnicity. Please modify the bill language as to "No population of students shall be subject to data collection of ancestry nation of origin and ethnicity origin". Please vote for bill SB359.

Best Regards,

Yan Huang, PhD
