

Subject Carbon Tax - Bill 5363 - Vote No on a Carbon Tax

The people of CT are already burdened with heavy taxes on energy and to place a Carbon Tax which will drive up the cost of energy in CT is simply morally wrong.

A Carbon Tax will have a negative input on CT businesses which will be forced to pass the tax on to consumers, which will drive up the cost of living in CT.

I urge the CT state legislature to vote down Carbon Tax bill 5363 a needless tax. CT is already awash with taxes and to impose another useless tax such as the Carbon Tax will just hurt the people of CT.
