

Dear Environmental Committee of The Ct. General Assemble;

I greatly encourage you to vote in favor of house bill 5363. We have found out that the carbon fee is the best way to deal with carbon emissions at their roots. It has bi partisan support and can be a great asset in saving our world for our grand children and beyond. The Citizens Climate Lobby and it's sister organizations have lobbied in a positive way in telling senators, congressmen and others about the problem of climate change. We tell them that we have a problem in climate change rather than they are the problem.

Connecticut, California and other states can lead in the fight against climate change even though Washington cannot at this time. grassroots support for any cause is always the best way to do things. Most of us have used fossil fuels throughout a good part of our lives in today's world so we are not totally innocent of climate change. However, we can all give back to the Earth to make up for what we have taken from it.

Yours truly; James Buchanan
