

Dear Environment Committee of the Connecticut General Assembly,

My name is Lior Trestman, I am a resident of Norfolk, CT. I am in favor of a carbon tax because it is the clear path forward. Establishing a carbon tax would not only be the right thing to do for the people and the environment in Connecticut, it would make Connecticut a leader in environmental reform. The days of companies polluting our environment for their gain without cost need to come to an end.

Please make the right decision,  
Lior Trestman
