

Dear Senator Miner, Senator Kennedy, Representative Demicco and members of the committee:

I am a resident of Litchfield county, and I would like to ask that you **please permanently ban toxic, radioactive fracking waste in CT**. Our environment, health, property values, town and state budgets cannot afford the accidents, spills, leaks and inadequate treatment that are contaminating other states. There are thousands of spills in other states with regulations and waterways are already radioactive. Please ban this waste in CT so we don't face the same contamination problems here.

Thank you,
