Dear Honorable Senator Miner, Senator Kennedy, Representative Demicco and distinguished members of the committee,

Please permanently ban toxic, radioactive fracking waste in Connecticut. Our environment, health, property values, town and state budgets cannot afford the accidents, spills, leaks and inadequate treatment followed by discharge that are contaminating other states. There are thousands of spills in other states with regulations and waterways are already radioactive. We need to ban this waste in CT so we don't face the same contamination problems here.

As a Mother, a boater, a swimmer, and a nurse, I am especially concerned about the effects of toxins on children's health. Please do the right thing and vote for Senate Bill 103 "An Act Concerning Hydraulic Fracturing Waste in CT."

Thank you and Sincerely,

Sue Asselin
