

February 22, 2018

Honorable Senator Miner, Senator Kennedy, Representative Demicco and distinguished members of the committee,

We have called Connecticut home for over 13 years now. And we love it. And we want to stay here to be near our children and grandchildren. We have so much at stake to keep Connecticut clean. Please, please permanently ban toxic, radioactive fracking waste in CT. Our environment, health, property values, town and state budgets cannot afford the accidents, spills, leaks and inadequate treatment followed by discharge that are contaminating other states. There are thousands of spills in other states with regulations and waterways are already radioactive. We need to ban this waste in CT so we don't face the same contamination problems here.

Respectfully yours,

Rita and Bob Hannafin
