

To the Honorable Senator Miner, Senator Kennedy, Representative Demicco and distinguished members of the committee,

Regarding Senate Bill 103 "An Act Concerning Hydraulic Fracturing Waste in CT",

I strongly urge you to change the laws and increase the safety of everyone, by creating a permanent ban on toxic, radioactive hydraulic fracking waste in the state of Connecticut. It is incredibly dangerous for so many reasons, and I am extremely concerned about the residents of your state. I have loved ones and dear friends whose lives and health will be jeopardized and likely in grave danger if there is no permanent ban enacted.

Please do everything humanly possible to put the lives and health of the men, women, and children who are your constituents, as well as all of their beloved pets, of course. Way too much is at stake to allow hydraulic fracking waste into the great state of yours.

Thank you kindly.

Sincerely,

Karen Ingerman
