

Environment Committee  
CT General Assembly  
Hartford, CT

February 18, 2018

Honorable Senator Miner, Senator Kennedy, and Representative Demicco:

Please pass a permanent, comprehensive ban on all forms of fracking waste coming into our beautiful state of Connecticut. With 36 towns having passed local fracking waste ordinances and 15 bans pending, rarely have the people of CT spoken more clearly on an issue.

We are afraid for the health of our families and for good reason. Fracking waste is toxic beyond belief and the idea that the Department of Energy and Environmental Protection can protect our health is not credible. DEEP's budget and staff have declined steadily in recent years, so why give this agency yet another task that it can not carry out, particularly when there is so much else it needs to be doing?

Please protect the people of CT from this potential harm and unnecessary threat.

Many thanks,

Peter Millman
