Re: Senate Bill 103

I ask you to support SB 103. I do not support allowing fracking waste to be disposed of or stored in CT. No matter what protections one might think are sufficient to isolate the dangerous elements of fracking waste, hurricane, floods and other natural disasters have shown the fallacy of that thinking. Fracking waste has carcinogenic chemicals and radioactive materials that are harmful to people plants , animals in multiple ways. Are you aware that fracking waste is used for dust control De-icing of roads? I am appalled with that and the strong possibility that runoff will contaminate ground water, not to mention people using the roads.

Please protect our environment and people and future generations by supporting and passing SB 103. Thank you.
