

Honorable Senator Miner, Senator Kennedy, Representative Demicco and distinguished members of the committee,

Please permanently ban toxic, radioactive fracking waste in CT. Our environment, health, property values, town and state budgets cannot afford the accidents, spills, leaks and inadequate treatment followed by discharge that are contaminating other states. There are thousands of spills in other states with regulations and waterways are already radioactive. We need to ban this waste in CT so we don't face the same contamination problems here.

Sincerely,  
Eunice Rhodes  
40 Cannon Drive  
Amston, CT 06231
