

Dear Honorable Senator Miner, Senator Kennedy, Representative Demicco and distinguished members of the committee:

While we have already taken action in the town of Glastonbury, please permanently ban toxic, radioactive fracking waste in CT. Our environment, health, property values, town and state budgets cannot afford the accidents, spills, leaks and inadequate treatment followed by discharge that are contaminating other states. There are thousands of spills in other states with regulations and waterways are already radioactive. We need to ban this waste in CT so we don't face the same contamination problems here.

Please help to keep Connecticut safe for our children and grandchildren. We don't live on shale – don't make us deal with the ugly consequences of fracking.

Thank you for your attention.

Sincerely,

Patricia Sivo Cole  
109 Little Acres Road  
Glastonbury, CT 06033
