

Testimony for Senate Bill 103

I am urging you to pass this bill as it is important that we not expose our people and our environment to the potential dangers of fracking waste. In our town of Ashford, as well as other CT towns, we easily passed an ordinance banning fracked waste. The townspeople overwhelmingly voted in favor of the ban as they realized the threats to our health and safety and vitality of our natural resources. Connecticut needs to protect its resources and people by not allowing fracking waste in our state. Thank you for your attention to this important issue.
