

Good day,

My petition is on the behalf of hard working families throughout the State of CT. Many families are extremely overburdened due to the high cost of utilities for our state. Our livelihood is severely impacted as families are struggling to keep their homes warm, cook or even charge that emergency phone.

Just about everything is connected to electricity and families are placed in peculiar positions where they have to go without other necessities in order to keep their electricity on.

Senate bill 9 would make it possible for local companies like the CT Green Bank and Posigen Solar/Energy Efficiency to continue offering programs which assist families significantly by lessen their energy burdens.

I look forward for an opportunity to give my testimony in support of the this Senate bill 9.

Thank you,  
Susan Young  
Bridgeport, CT
