Municipal Impact: None

Explanation

The bill creates a new felony for the sale and possession of a rate of fire enhancement and results in potential cost and potential revenue from fines. To the extent that violators are prosecuted, the bill results in a potential cost to the Department of Correction for incarceration or Judicial Department for probation supervision. On average, the marginal cost to the state for incarcerating an offender for the year is \$1,900¹ while the average marginal cost for supervision in the community is less than \$700² each year.

¹ Inmate marginal cost is based on increased consumables (e.g. food, clothing, water, sewage, living supplies, etc.) This does not include a change in staffing costs or utility expenses because these would only be realized if a unit or facility opened.

² Probation marginal cost is based on services provided by private providers and only includes costs that increase with each additional participant. This does not include a cost for additional supervision by a probation officer unless a new offense

House "A" strikes the underlying bill and the associated fiscal impact and results in the impact described above.

The Out Years

The annualized ongoing fiscal impact identified above would continue into the future subject to the number of violations.

is anticipated to result in enough additional offenders to require additional probation officers.
