

Dear Government Administration and Elections Committee,

I am writing to support #HB5173. I do not want the month and date of my birth to be available to protect from identity theft. I also appreciate the ability to opt out of information being released from the voter file.

I believe this to be an attempt of voter suppression on the part of the Trump administration, to silence our voice, to circumvent our judicial system, to ban our voting rights and to, ultimately, negate the 99%. This is unacceptable.

Thank you for making my information more secure!

Sincerely,

Jamie Whitman
