

Greetings:

Our country has become a joke around the world. We preach democracy; in the process spilling the blood of brave Americans in countries most of us cannot even pronounce, yet here at home our electoral college system makes someone else's vote more valuable than my own.

This injustice must end...we must start now to return real - one person/one vote - democracy to our nation. The president of this country needs to be chosen by the majority of people who vote...period.

Time to end our sham version of democracy with real democracy!

Please approve HB 5421.

Thank you
Alan Aronow
