

To whom it may concern:

I vote in Stamford CT and feel that unless we have a National Popular Vote for president, my vote does not count as much as a vote in a swing state. CT has gone for a democrat for president by a large margin, so it seems there is not a good reason for me to go out to vote. If all votes actually counted in a National Popular Vote, it would make a huge difference in engaging the public in elections.

Thank You

Dr. Terry Blank
