

In a support HB5036

To whom it may concern,

It has come to my attention that locally owned and smaller breweries are constrained to the amount of beer they can brew. As an advocate to the American dream of being able to grow a business and become an entrepreneur as well as a person who enjoys good beer, I would advise we fully support this motion to unrestrict the amount of beer to be sold in the state of Connecticut. With a strong community of newer and residual craft brewers moving and residing in the state of Connecticut we need to support their business and make it so more would move to Connecticut. I don't see the equality in the sense the wine company's both local and nationwide are not capped in the same manor I find that it puts these breweries at an unfair market advantage.

Just to recap I would like to see this motion be passed. I appreciate the time you have taken to read this message. Thank you again have a great day.
