Are we in this state going to sell our soul for money. Get our fiscal needs in order without harming or using unsafe techniques to raise money for the dept in our state. Protect the children and adults in this state. We don't need more substance abuse, we already have a huge problem with opiate and addiction problems in our state. All you have to do is look at studies in what has happened in Colorado, my niece is a nurse there and has seen first hand the health problems that state is enduring. Do we want to raise more issues in the future, having to spend monies on health issues.
