Transportation Committee:

Thank you for this opportunity to submit comment regarding Raised SB 388. I support this pilot program.

In my opinion, reckless driving – in which I include excessive speeding – has become more widespread since I obtained my license more than ten years ago. I appreciate that constant enforcement of such rules to keep the public safe is nearly impossible, given the number of motorists and highways in our state. However, this program has the potential of delivering consequences to those who endanger others. This will either raise revenue in the form of tickets, or make our highways safer. In either case, I support this measure.

Thank you for working to keep our roadways safe, and for your consideration of my comments.

Melanie Finn-Scofield
