

Yes, I support HB 5129.

The Connecticut Lakes Foundation has as a mission to educate the value of clean lakes in our environment. I have for many years enjoyed Amston and Rogers Lakes in Connecticut. Keeping the water free of invasive plants is necessary and the license plate will help in the need to protect this delicate balance.

Furthermore, I am the artist that designed the license plate. This has also led me to a deeper understanding of the mission of CLF. Both the Hartford Courant and the New Britain Herald have written feature articles pertaining to the bill you consider today. there is greater understanding of the need to protect our precious lakes.
