

To Whom it May Concern,

I am writing in support of Bill Number (HB5129). As someone who lives on a CT lake as well as a science educator in the state of CT I recognize the importance of this bill. There is a growing concern for the issues facing our lakes and ponds. This bill would allow all those concerned about this issue to show their support by purchasing a Save Our Lakes license plate. Revenue from these plates going directly to the DEEP to help fund efforts to deal with the invasive aquatic plants and toxic cyanobacteria is of utmost importance if residents and vacationers want to continue enjoying the beautiful lakes and ponds of CT.

Sincerely,

Melissa Brutting
