

We are homeowners and voters living on West Side Pond in Goshen. We have had a home here since 1993 and have been a regular visitors for many years before that. We have witnessed the huge increase in invasive weeds that threaten to throttle our beautiful lake. We need to make everyone aware that Connecticut lakes, a natural and vital state asset, will continue to deteriorate and in some cases disappear without action to prevent them choking on the ever-spreading weeds.

We fully support HB 5129 in its efforts to raise funds to support Connecticut lakes through the use of "Save Our Lakes" license plates.
