

Dear Environment Committee of the Connecticut General Assembly

My name is Brad Hall and I reside in Norwalk, CT. I am writing in support of H.B 5363. I would be proud of CT to show some leadership in our fight against climate change. I have taken several classes given by the Earth Institute at Columbia University about the dire state of the climate. The time to act is now! A carbon tax can go a long way in curtailing carbon emissions and ultimately save the state a great deal of money by avoiding more climate related property damage.

I urge you to show real leadership and fight for a live supporting climate.

Thank you,

Brad Hall
