

February 22, 2018

Honorable Senator Miner, Senator Kennedy, Representative Demicco and distinguished members of the committee,

Please support Senate Bill 103 to protect Connecticut cities, towns and residents from the harmful effects of radioactive fracking waste. Connecticut doesn't need to assume the contamination risk that could occur if tanker trucks traveling on our public roads had accidents, or spilled or leaked waste. We don't want to see toxic fracking waste used as a road treatment or construction fill.

Connecticut needs to protect its citizens, environment, and natural resources (such as clean water and soil) from contamination. Fracking waste contamination can also hurt property values and cost our state, towns and cities money and time to clean up.

By permanently banning fracking waste from Connecticut, we can help ensure that Connecticut will continue to be a wonderful place to live for our children and grandchildren.

Sincerely,

Janet and Paul Bryant
