

Dear Legislators,

I urge you to support Senate Bill 103 banning waste from hydraulic fracking.

I live in Coventry and our town was one of the first to pass a no fracking ordinance locally. It passed unanimously. Since then, over 30 communities have said no to fracking waste in the form town ordinances or resolutions. We do not want contamination of our roads, waterways, and land. We do not want to undermine the health of our residents. There is no full proof method for ensuring that the processed fracking waste will in fact be safe. Regulations alone will not ensure that.

Please support and advocate for Senate Bill 103.

Cathy Cementina
