RE: Senate Bill 103

Honorable Senator Miner, Senator Kennedy, Representative Demicco and distinguished members of the Environment Committee:

I urgently request that you please permanently ban toxic and radioactive fracking waste from coming into Connecticut. Many other states are already dealing with serious contamination of waterways, landfills, roads, etc.. These radioactive materials should have no place in our communities, (or in our entire country for that matter!) Let's keep Connecticut free of this serious risk, which not only endangers people's health, but can also have a serious effect on property values, long-term devastation of the environment, and require huge costs for cleanup.

Thanks to each of you for your hard work and dedication to the well-being of our state and our people. Please urge passage of this bill.

Sincerely,

Kathleen M. Dargan
