

Honorable Senator Miner, Senator Kennedy, Representative Demicco and distinguished members of the committee:

**Please permanently ban toxic, radioactive fracking waste in Connecticut.**

Fracking waste affects our environment, health and property values. Connecticut towns and state budgets cannot afford the accidents, spills, leaks and inadequate treatment of fracking waste. There are thousands of spills in other states such as Pennsylvania. We need to ban this waste in Connecticut so we don't face the same contamination problems here.

Sincerely,

Elizabeth Eldridge
