

Honorable Senator Miner, Senator, Kennedy, Representative Demicco and distinguished members of the Environment Committee,

My name is Sarah Emigh and I am a recent graduate from the University of Connecticut. During my time in college, I majored in Environmental Studies, where I learned about various environmental issues and how they impacted people. After learning about how harmful fracking waste is to natural resources within communities, I am fully supportive of comprehensive ban on all types of fracking waste.

Please take into consideration the toxins and known carcinogens that could be emitted into our waterways, air, and land (some of which take thousands of years to disintegrate). Please help us avoid any possible health risks associated with fracking waste by voting to completely ban all forms it (before, during, and after the fracking process) in the state of Connecticut. Please protect our current citizens and the future of Connecticut. Thank you for your time.

Best,

Sarah Emigh
