

Honorable Senator Miner, Senator Kennedy, Representative Demicco and Distinguished Members of the Committee - Please permanently ban toxic, radioactive fracking waste in CT. Our environment, health, property values, town and state budgets can not afford the accidents, spills, leaks and inadequate treatment by discharge that are contaminating other states. We need to ban disposal of this waste in CT for the future of our children, ourselves and our state. Thank you for your service to the people of CT!

Regards,
Robie Grzyb
