

To our trusted legislature, of the great State of Connecticut:

Please permanently ban toxic, radioactive fracking waste in CT. Our environment, health, property values, town and state budgets cannot afford the accidents, spills, leaks and inadequate treatment followed by discharge that are contaminating other states. There are thousands of spills in other states with regulations and waterways are already radioactive. We need to ban this waste in CT so we don't face the same contamination problems here.

You and I have children, and grandchildren who drink the water and breathe the air here. Who deserve to enjoy our beautiful state and feel safe and have a sense that ours and their best interests are always at the heart of the decisions being made regarding our future and that of our state. Don't turn Connecticut into a toxic dumping ground that puts a literal and figurative cloud over us all, waiting for a shoe to drop, or the next cancer cluster to emerge.

PLEASE, for the sake of our posterity. Thank you for your serious and contemplative consideration.

Very truly yours,

Anna Hara  
Hebron, CT
