

**Senate Bill 103 "An Act Concerning Hydraulic Fracturing
Waste in CT"**

**217 Sharon Turnpike
Box 176
Goshen, CT 06756**

February 19, 2018

**Honorable Senator Miner, Senator Kennedy, Representative
Demiccio and fellow members of the Environment
Committee:**

**Although we are lucky enough in Connecticut to NOT have
tar sands in our backyard, we still need to heed warnings
about the negative effects of fracking waste that could
potentially affect our citizens. Why should we risk these
effects (radioactive and chemical contamination,
carcinogenic and other health exposures)? Is there anything
positive for the people of Connecticut in having this waste in
our State?**

**There is a plethora of information about fracking waste and
other types of contaminants. Please consider ALL the facts.
Senator Miner lives and represents an incredibly beautiful
part of our state. Do we really want to chance spills, leaks,
and other accidents poisoning our land and water?**

**Please consider moving this Bill forward in a responsible
manner. Nothing is worth putting your constituents' health
and welfare in jeopardy.**

Respectfully,

**Janet M. Hooper RN OCN, Goshen
Member Mission 4/1 Earth and Green Garden Committee
Church of Christ, Congregational, UCC Goshen**
