

Support SB 103: Fracking Waste Ban in Connecticut

Dear Sen. Kennedy, Sen. Miner, and Rep. DeMicco:

Please support SB 103 and pass a state-wide ban on fracking waste in CT. My town of Bloomfield has already passed a local ordinance. This will help us eliminate the possibility of toxic and potentially radioactive waste getting onto our roadways through spills or brine, into our construction sites through fills that contain fracking waste, or into our waters through accidents. Nor do we want fracking waste treatment plants in our state. CT's environment is too important to expose it to this environmental waste product.

Thank you for your consideration,

Valerie Rossetti
