

To All Members of the Environmental Committee and State Legislature,

My name is Anne Speiser, I live at 92 Whispering Pines Rd., Avon, CT.

I am writing to register my support of SM 103. As a constituent, I urge you to pass SB103 as an act to protect our State's environment, including the water, air, earth, humans, animals, birds, fish, and all future generations. The toxic chemicals in fracking waste, including radioactive materials are not only toxic in present time, but also cannot be cleaned up. Once they are in our soil, our water, our air, they will remain there for generations to come. There will be no quick fix, and our children and their children will bear to burden of our unwillingness to protect the earth and them.

Please, I deeply urge you to pass this bill.

Sincerely,

Anne Speiser, RN, BSN
