

Honorable Senator Miner, Senator Kennedy, Representative DeMicco and distinguished members of the committee,

Please ban fracking waste in Connecticut, permanently. In Woodstock, we passed a fracking waste ban last year at town meeting. This ban needs to be state wide. Fracking waste is toxic and radioactive and the danger of leaks, spills or accidents is too great to risk. Other states, which have regulated fracking waste but not banned it, are dealing with thousands of spills. They are dealing with contamination problems that wreak havoc on public health, property values and the environment. Please do not put Connecticut in this position. Ban fracking waste now. Please pass Senate Bill 103.

Thank you,  
Su Connor
