

Honorable Senator Miner, Senator Kennedy, Representative Demicco and distinguished members of the committee,

I am writing to request your support for passing a permanent ban on hydraulic fracking waste in CT. This toxic waste should have no place in our state. Our citizens should not be exposed to the risk of it's negative effects on on health, property values and and budgets.

I am working along with others to pass stronger language at the town level, as thirty seven other towns have already.

Sincerely,

Christine Winter
