

Dear chairs & members of the environment committee : my name is Mike g Papa from Artscape organic care llc..... Today I am afraid that with this mind set strategy of the use of PESTICIDES at all cost, and IGNORE the rest , we have lost most the skills our ancestors used trough excellent stewardship strategy. Only if we practice a more BALANCED approach in collaboration with specialists in different disciplines from agronomy to science and the (right type)of technology will be able to allow the ecosystem to work for our own benefit. The way we are working today through the heavy use of PESTICIDES it is detrimental !! As a result we are EXPERIENCING the consequences of aquatic invasive species and Cyanobacteria blooms. Sincerely Mike g Papa.
