

Testimony regarding Senate Bill - 427

From Jonathan S. Avery , President of Hazardville and Jewett City Water Co. , 281 Hazard Ave., Enfield, Ct.

I would like to submit my objection to the use of the words - " Public Trust " which were inserted into the State Water Plan at the very end of the process. The State Water Plan is suppose to represent a carefully balanced view with all parties carefully working out an end product supported by all. It is not clear what these two words mean and it is important that all parties know what the intent was for inserting these words at the "11th hour". Removing these words from both the plan and executive summary addresses my concerns.
