

Dear Committee Members,

I am writing to let you know of my strong opposition to a SB 427, which would limit our environmental protection act and privatize water in all CT wells. The public trust doctrine laid out in CT Statute Section 22a-15 states: "there is a public trust in the air, water and other natural resources of the state". That seems very clear! It does not exempt private wells. I own a private well and I still object to this bill.

Thank you,
Susan Devokaitis
