

Dear Members of the Environment Committee:

I am writing to oppose SB 427, an unconscionable proposal aimed at putting holes into our environmental protection act by privatizing water in all Connecticut wells. Water, like air, is a public-trust resource, not a corporate or even a private/personal football. Abundant clean water for human consumption, for animals and plants, and for recreation is an asset that must not be “privatized.”

Please do not subvert the new state water plan. Kill SB 427.

Sincerely,

Steve Kemper
