

I strongly and vehemently oppose CT: proposed Senate Bill 427 attempts to privatize all wells in the state, deliberately removing them from the umbrella of the public trust doctrine laid out in CT Statute Section 22a-15:

As a property owner and tax payer in the town of bloomfield, we fought and lost to corporate interests who took advantage of our local reservoirs, resulting in huge water are hikes to my neighbors using MDC water.

We have a well, and consider our ground and dwelling property to be what we pay exorbitant taxes for. No corporation or entity has a right to property we are taxed on!

This is a serious affront to individual property owners in the state of connecticut. Please don't pass this corporate bullshit. The rights of individuals have been erased enough by corporations.
