To Whom It May Concern:

I am very saddened to see that lobbyists are trying to exclude private wells from the Clean Water Act.

I have no idea how a well which taps into an underground river would have any less protection than any other natural resource of the state of Connecticut.

Without this protection of our private wells, anybody could use these wells as much as they wanted and industry or fracking would not get in trouble. Spills into private wells would be the property owner's problem, all a very scary situation!!

Please, please do not exclude private wells from the Clean water Act, it would be disastrous for our environment.

Thank you

Moira Lynch
