

March 13, 2018

Dear Members of the Environment Committee,

I am writing to strongly oppose SB 427. This bill would limit our existing environmental protection act and privatize water in all CT wells. This is bad policy. It differentiates one kind of water from another, when our water supplies are interdependent and should ALL be protected as a public trust for future generations. It would open the door to abuse and misuse of this critical natural resource.

I urge you to kill this bill now.
