

Dear State Senators,

We stand in strong opposition to a SB 427, which would limit our environmental protection act and privatize water in all CT wells.

Large private water utilities with multiple wells, along with major bottling companies, already do, or stand to, profit from being assigned the rights to own, drill or otherwise capture and/or bottle state water for profit while escaping state regulations.

Our state waters are a precious and essential resource to be protected and managed for the benefit of all.

Respectfully submitted,

Connie and Don Reder
